- Biostatisticians
- Environmentalists
- Doctors and nurses
- Projects/Programs managers and Evaluators

## Our Approach

Eschol Consulting delivers services that are perfectly adapted to your needs, with as a major asset its direct contact with the field, thanks to:

- Our follow up of the teams of consultants
- Our shared thinking on approaches and methods

- Our independence and sense of ethics
- Our respect of deadlines and commitments

The reduction of the consequences and Inequalities resulting from the major problems affecting the well-being of the populations is a priority of Public Health which requires innovation, experiments putting in synergy various institutions and actors who do not always have common cultures nor the same theoretical references. The reduction of malnutrition, malaria, HIV / AIDS, cholera, the challenges of PMTCT, the EPI to name just a few, require the cross-fertilization of the eyes and skills of professionals in all these sectors to develop innovative responses to meet these new challenges.
